NORTHLAND NETWORKS

Northland Networks is a conduit to bring together developers and municipalities with lenders and investors to create commercial loans. These companies offer investment and finance services for government entities, financial institutions, non-profit organizations, and individual investors. Northland Networks places loans both privately and through loan syndications. At the heart of Northland Networks' success is a national network of community banks who are the lenders for each Northland-originated loan. Northland Networks' commercial loan program provides its borrower clients with the financing they need at flexible terms, while providing banks with quality structuring and strong due diligence.
